February 18, 1960

REPORT TO: Bert Cole, Secretary to Capitol Committee

FROM: Michael Bigley, Technical Consultant to
Capitol Committee

SUBJECT: Location of Time Capsule on Campus

Reference is made to Chapin Foster's letter of September 28, 1959 and other related correspondence attached.

The best information I have been able to find on the location of this Time Capsule, is that it is buried 6 feet east at the half-way mark of the north-south cement walk in the parking strip between the Legislative Building and Temple of Justice. There is no marker on the site and no accurate referenced survey description of its location.

Since this is a temporary deposit of the Capsule and there is danger that its location may be lost, I recommend that the Capitol Committee approve a relocation of the Capsule to a permanent site with adequate reference of location and a suitable marker installed.

Chapin Foster's letter indicated that an architect had prepared plans for this development which would cost approximately \$5,000. I have not seen these plans and Clyde Fenn and I both agree that this cost appears somewhat high and perhaps, may be too elaborate. Fenn suggested that the Capsule could be placed at the center-point of the sidewalk then sealed over with cement and a bronze plaque with suitable description placed thereon. He further suggested that such work should not cost over \$250. and it could be financed out of the \$150,000 appropriation which the Capitol Committee has for Campus work.
